Our Specialized Offerings

Why to choose GIT for your IT transformation to AWS Cloud?

Certified Team

Certified experts delivering exceptional service for your AWS needs

Tailored AWS Consulting Services

Custom AWS solutions tailored to ensure your business success.

Cloud Migration to AWS

Seamless and efficient transition to the AWS cloud platform.

Optimize AWS Cost-FinOps

Maximize savings with strategic AWS cost management and optimization.

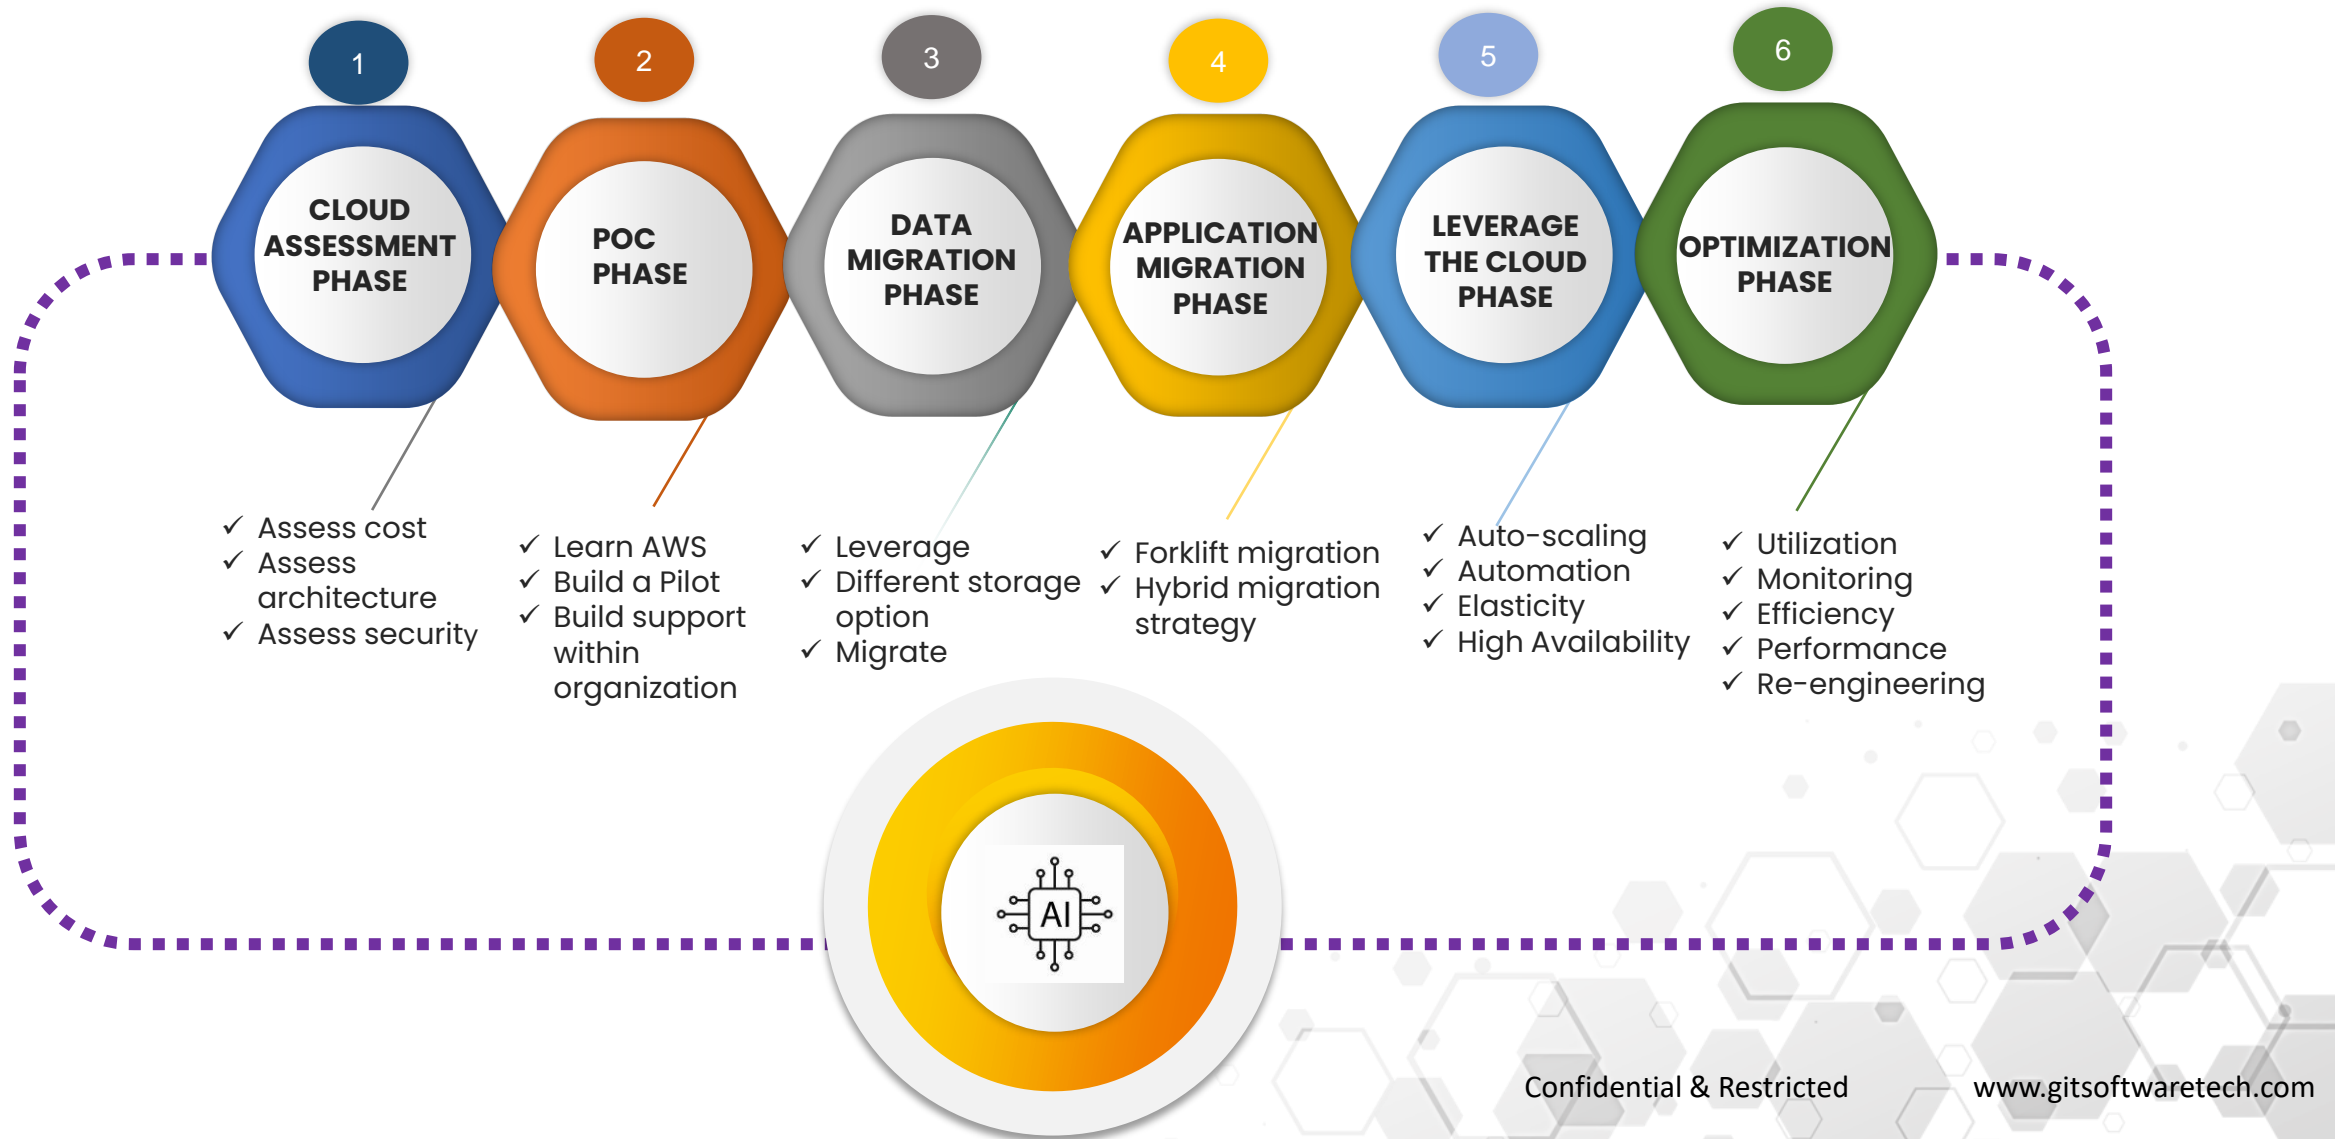

AWS Security Solutions

Robust and comprehensive security solutions for AWS infrastructure protection.

AWS MIGRATION CONSULTING SERVICES

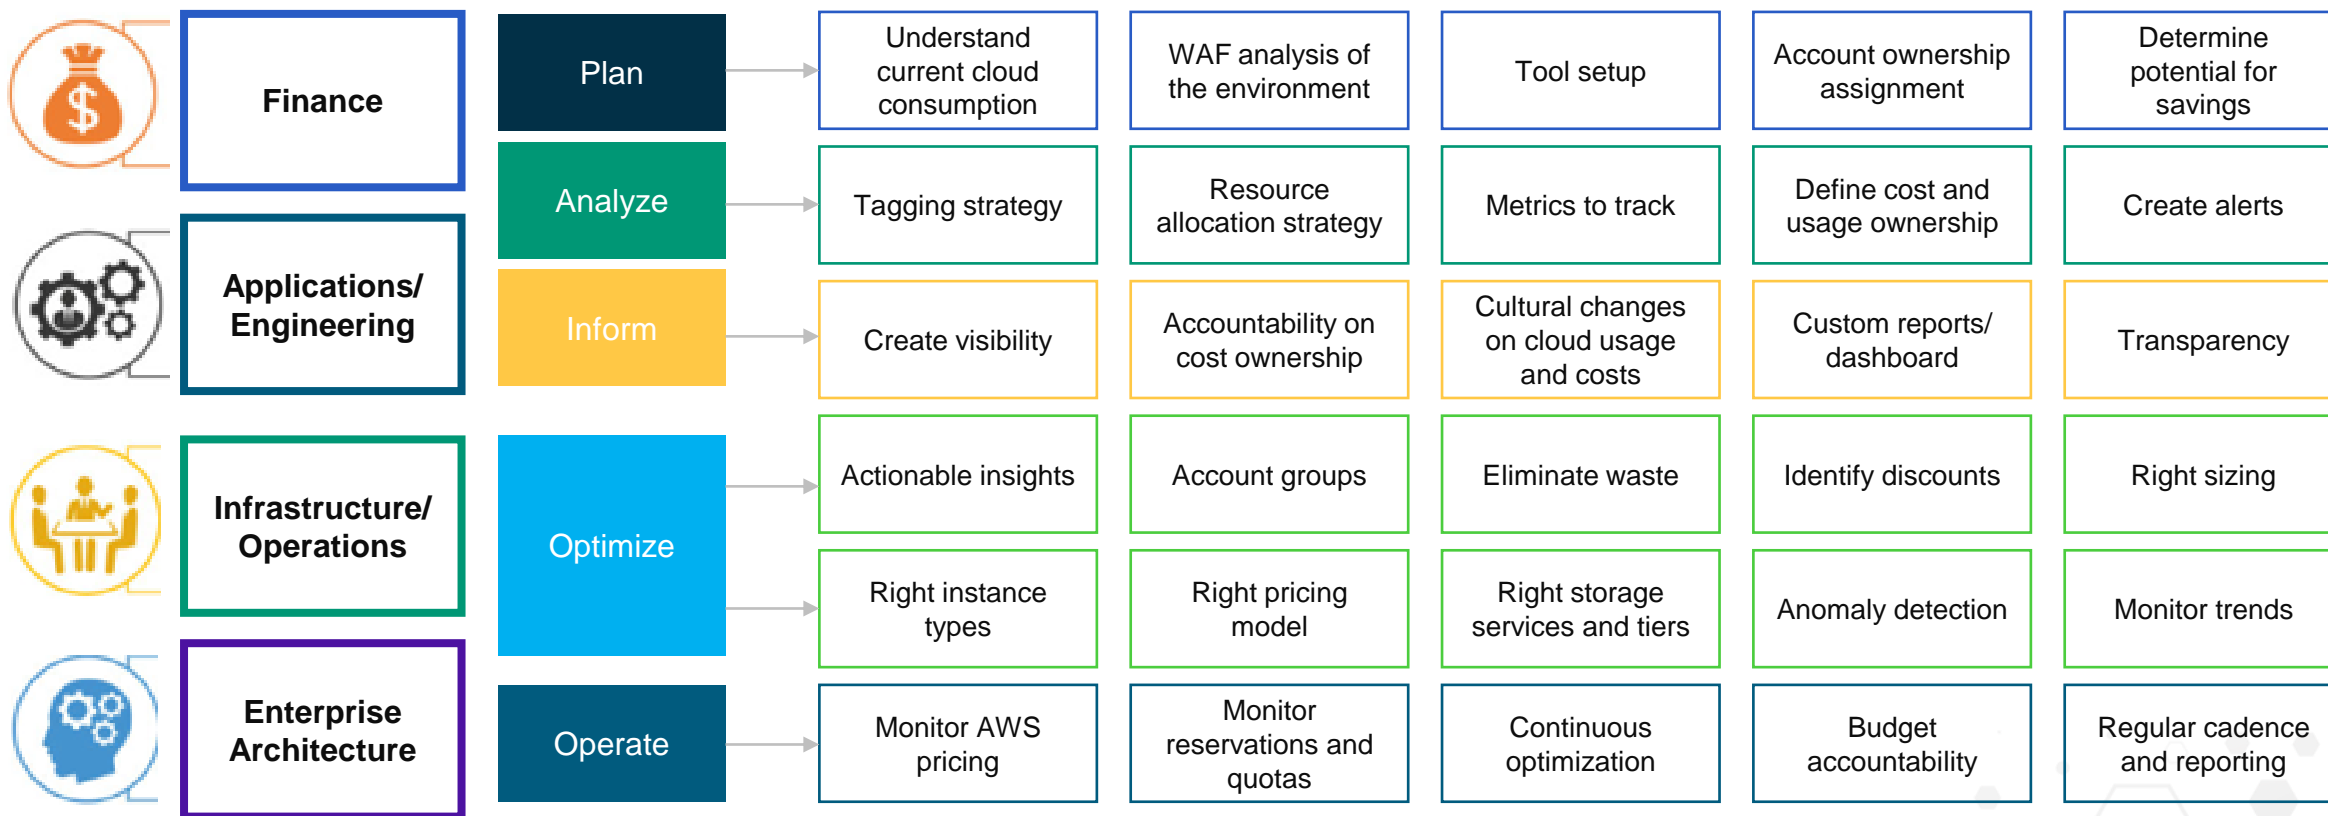

to scale & deliver value through strategic partnership

AWS Cloud Migration Consulting Services – Strategy, Process, Benefits

GIT CLOUD COST OPTIMIZATION – FinOps

Strategies for Efficient Cloud Financial Management

Customer Benefits

- ✓ Time to market – reduced by 30%
- ✓ Distributed AGILE Delivery Model (DADM) saves TCO by over 25%
- ✓ Increased end-user adoption with a market research-led approach to CX

- ✓ Seamless delivery: highly available for US time zones
- ✓ Dedicated teams – the top talent in PODs as an extension of client teams
- ✓ Ease of engagement: 4 weeks to onboard, 4-week termination

MANAGED SERVICES

MANAGED SERVICES

Unlocking Business Potential with Strategic IT Support

We proactively reduce your IT costs and mitigate all your business risks.

Application Managed Services

We envision your business needs to co-create web application and handle till testing, deployment and maintenance.

Infrastructure & Database Services

Enabling you to manage your IT foothold and reduce your TCO with continual monitoring and tracking.

Cloud Managed Services

Opt for cloud services which provides you with speed, agility and complete control of your applications.

Application & IT Outsourcing

Ensuring that all software and business processes work at peak performance levels and deliver maximum value

APPLICATION MANAGED SERVICES

are designed to help organizations manage their applications more effectively.

GIT Software Technologies is your trusted partner in crafting the future.

- ✓ Assessment of application environment:
 - Analysis of the current state of the applications
 - Analysis of the technology infrastructure
 - Analysis of the organization's goals and objectives
- ✓ Planning and implementation of AMS solutions
 - GIT will work with the organization to develop a customized plan for implementing AMS solutions
 - Deployment of new technologies,
 - Integration of existing systems, and
 - Development of custom processes and procedures.
- ✓ Ongoing management and optimization of applications
 - Continue to manage and optimize the applications to ensure that they run smoothly and effectively
 - Regular performance monitoring,
 - Software updates,
 - Security patches, and
 - Other maintenance activities
